FORMULA 300

Type F Transmission Fluid

FORMULA 300 Type F Transmission Fluid is designed to meet the Ford specification M2C33-F. Transmissions requiring Ford specification M2C33-F, calling for fluid also known as Type F transmission fluid, have unique fluid requirements that are difficult to meet with traditional multipurpose transmission fluid. For this reason, it is necessary to have a fluid specifically for transmissions calling for a Type F fluid.

Since Ford specification M2C33-F is an obsolete specification it is not uncommon to find fluids in the market place that are of inferior quality. FORMULA 300 continues to blend Type F Transmission Fluid to specification with a proven additive package deliberately designed for this unique specification.

This product is recommended for use in Ford transmissions built in 1977 to 1980 specifying M2C33-F. This product is suitable for use in 1976 and older model Ford, Lincoln and Mercury cars, vans, and light trucks. Product usage in newer transmissions may produce unsatisfactory results or damage.

Always consult the owner's manual and follow the manufacturer's recommendations for the proper transmission fluid.

Typical Properties:

Product: FORMULA 300 Type F Transmission Fluid	
Product Code	1333
Color	Red
Kinematic Viscosity @ 100°C, cSt (ASTM D-445)	6.7
Kinematic Viscosity @ 40°C, cSt (ASTM D-445)	32.5
Viscosity Index (ASTM D-2270)	169
API Gravity (ASTM D-1298)	33.4
